KREMUDIOG: NEW TEME, FOR UNIVERSITY . SOVIET RESEARCHERS

A special Soviet research group has been formed at Stockholm University.
Professor Junner Wordel and dodent Nils-Ake Nilsson have taken the initiative
in this.

In light of the Soviet's increasing influence in the world it is viewed as important that the Soviet system be studied as systematically and objectively as possible, especially those aspects relating to Sweden.

The research group is divided into two sections. One group, in witch Gunnar Mirriel participates, will be concerned with the Soviet economy. The other, under fil. dr Bruno Kalmins leadership, will follow political developments.

Those questions which will be kept under constant study are the ones which are important to Swedish commercial life. The Soviet wood and pulp industries capacity and future competitive power will be studied aldeely. This also applies to the engineering industry.

The political aspects which will come to be studied more closely are among others the decision making process. Khrushchev cannot decide everything himself. Various decisions are delegated therefore to industry leaders, party functionaries and officials. How this works in practice is considered trelevent to any assessment of the Soviet system in its entirety.

To the goals of this group of kresologers will below also the education of future students in Soviet studies and the Russian language.

Those who are engaged in this activity are among others bureau chief Lief Björck, bureau secretary Alf Edecar radio's Sven Wallmark and Inger Palmson, amunuensus at the Government Science Institute at Stockholm University and daughter to our Moscow ambassador, Sohlman.

POMA 10-57 53a (40) USE PREVIOUS EDITION-BEPLACES FORMS 51-28 S1-28A AND 51-29 MISSIEM ARE OBSOLETE.
